

## DEFINITION

Watermelon seeds are extracted from traditional watermelon (*Citrullus vulgaris*) they are cleaned, dried and free from foreign taste or aroma

The following conditions have to be met in watermelon seeds for human consumption

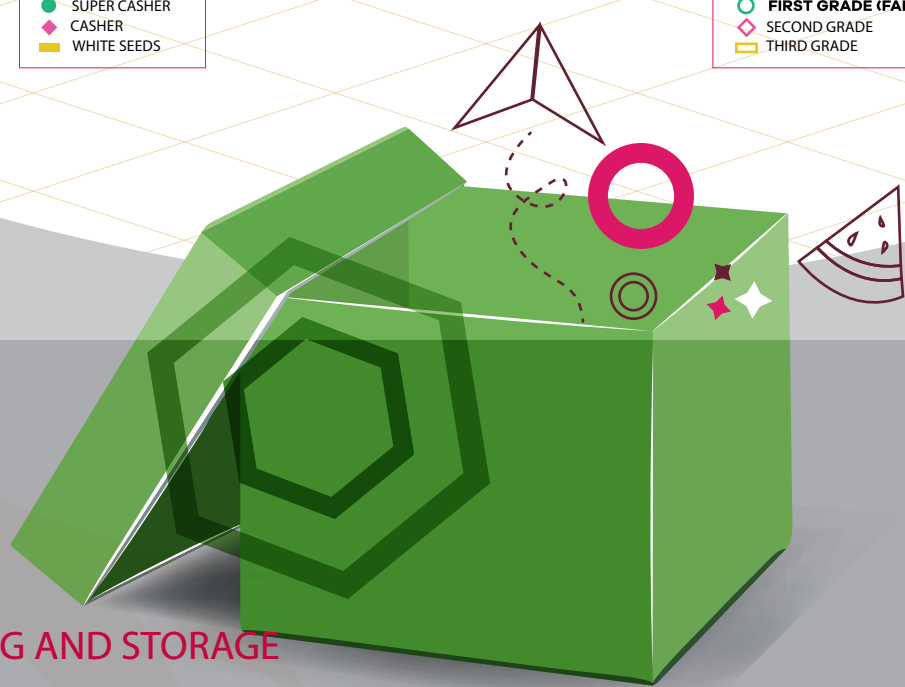

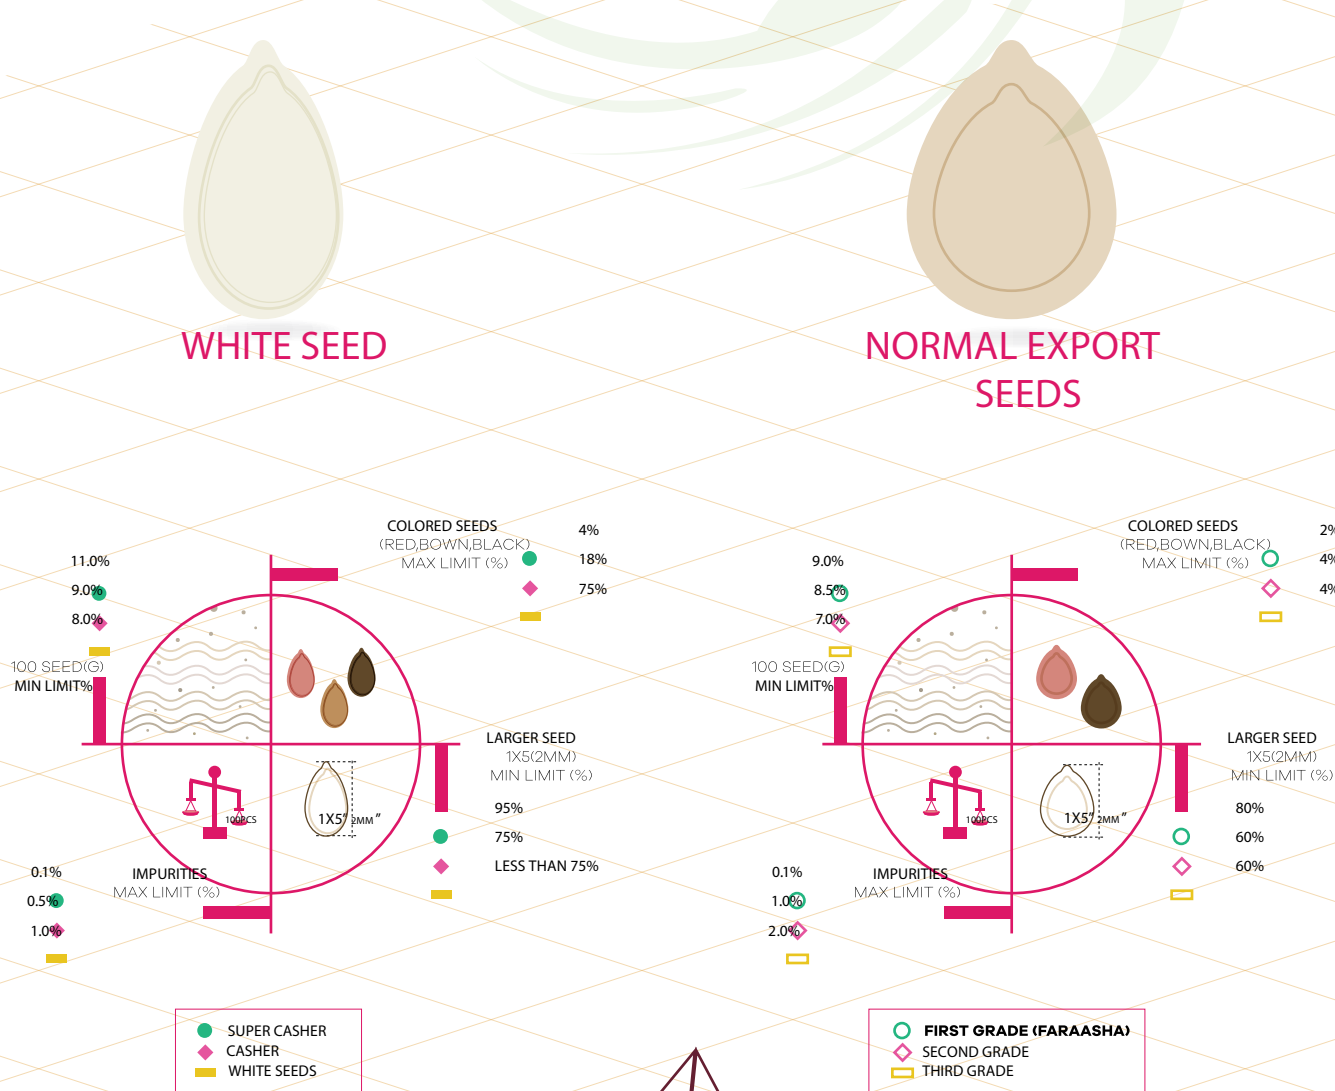

- Pesticides and weed killers are not to exceed the limit set globally.
- The seeds are to be free from heavy materials.
- All health requirements are to be followed when packaging/ transporting

The Sudanese Standard Specifications and Measurements are to be followed when taking seed samples for testing and are to be packaged and stored safely.

## WATERMELON SEEDS ARE DIVIDED UP THROUGH PHYSICAL REQUIREMENTS

Watermelon seeds are to be packed in aired container such as burlap (e.g Jute) or any other crop containers which are dry, clean free from foreign objects, dirt, moisture and smell. To be stored in well ventilated areas far from contaminants according to world storage standards for crops.

Every package is to have a clear badge not susceptible to damage to identify the following:-

PRODUCT NAME	PRODUCT TYPE	DATE OF PRODUCTION (MONTH/YEAR).	CODE
NAME			
COUNTRY OF ORIGIN	PLACE OF MANUFACTURE	BRAND NAME	NET WEIGHT (KG)
