

SOYBEAN

DEFINITION

The soybean seed is a seed, as described in Article 10 of the Seed Law, which is used for sowing and for animal feed.

CLASSIFICATION

Subspecies

Any of the seed groups from the subspecies *G. max* L.

Other subspecies

Any of the other subspecies from the subgenus *Glycine* L. or other subgenus.

Other subspecies

Any of the other subspecies from the subgenus *Glycine* L. or other subgenus.

REQUIREMENTS

General Requirements

The general requirements of soybean seeds shall be as follows:

- Seed moisture
- Free seed large particles
- Freedom from seed-borne diseases
- Free from germination-inhibiting agents
- Freedom from seed-borne viruses

TECHNICAL REQUIREMENTS

The crop of soybean seeds sown with the seed shall be as follows:

1. The crop of soybean seeds sown with the seed shall be as follows:
2. The crop of soybean seeds sown with the seed shall be as follows:
3. The crop of soybean seeds sown with the seed shall be as follows:

PACKAGING

Seeds shall be packed in sealed and strong containers which are made from wood, metal and plastic but in cases where the shape of the seed or other characteristics of the seed are not suitable for type of packaging used.

- Small packages: 1 kg
- Large packages: 10 kg or more or as per national law

LABELLING

In addition to the requirements stated in Article 10 of the Seed Law, the label shall contain the following information:

Minimum seed content (%)	Minimum purity (%)	Minimum germination (%)	Freedom from seed-borne diseases	Freedom from seed-borne viruses
35	95	85	100	100

The producer shall be bound to guarantee that from one year and when the amount of seed is not less than 100 kg, the seed shall be able to be sown in the soil and to produce the number of plants per hectare, indicated on the label, and shall be in conformity with the seed standard in question.

QUALITY

In addition to the requirements stated in Article 10 of the Seed Law, the seed shall be of good quality, the seed shall be in conformity with the seed standard in question.

QUALITY

Seeds shall be stored according to the requirements of the Seed Law.

TESTING

Seeds shall be tested in conformity with the Seed Law and the Seed Standard in question.

STORAGE

Seeds shall be stored in conformity with the requirements of the Seed Law and the Seed Standard in question.
